Table of Tables

1. Introduction

1.1. Purpose

This document documents the results of the TRDP implementation conformance tests.

1.2. Intended Audience

This document is intended to be used as template for documenting the results of the TCNOpen TRDP implementation verification.

1.3. References/Related Documents

Reference	Number	Title

2. Conformance Tests

The following tests verify the conformance of the TCNOpen TRDP implementation for TRDP Version 1.0.1.0 (SVN r967). For testing the programs “test/pdpatterns/trdp_pd_test.c” and “test/mdpatterns/trdp_md_test.c” delivered with this TRDP version were used.

2.1. Process Data

PD tests verify the exchange of process data between two devices A and B. All in [wire] defined PD patterns are tested.

All the test cases run continuously in parallel during the test session.

2.1.1. Testconfiguration

IP address device A: 10.10.24.100

IP address device B: 10.10.24.101

Multicast address: 239.255.24.2

2.1.2. PD1: Windows/TCNOpen - Linux/TCNOpen

2.2. Message Data

MD tests verify the exchange of message data between two devices A and B.
All defined MD patterns are tested on both supported transmission protocols TCP and UDP.

2.2.1. Testconfiguration

IP address device A: 10.10.24.100
IP address device B: 10.10.24.101
Multicast address: 239.255.24.2
